A system solution for small volume
liquid handling

- ▶ Decks fit racks of multiple brands
- ▶ Decks and racks made from recycled plastic

CORNING

Corning® DeckWorks™ Pipet Tips

Corning DeckWorks pipet tip system is designed to allow you to maximize storage space and help reduce the production and waste of plastic materials. Both the hinged racks and reload decks within this system are manufactured with recycled plastic.

The entire DeckWorks system is comprised of 7 sizes of graduated pipet tips which are longer than standard tips to minimize the contamination issues often associated with traditional pipet styles. Sizes include 10 µL, 20 µL, 100 µL, 200 µL, 200 µL extended length, 300 µL, and 1000 µL tips.

The pipet tips are made in a controlled molding environment to ensure accuracy and precision across all tip volumes. Medical grade resins and production excellence allow for full certification as:

- ▶ Nonpyrogenic
- ▶ Human DNA-free
- ▶ RNase-/DNase-free
- ▶ Sterility Assurance Level 10^{-3}

Remove deck from reload system.

Insert deck into hinged rack.

DeckWorks™ Reload Systems

Corning® DeckWorks reload systems are available in 10 µL, 200 µL, 300 µL and 1000 µL sizes and allow for convenient and economical reloading of durable Corning DeckWorks hinged racks. DeckWorks reload decks are packaged in transparent trays for easy tip identification, require no transfer devices, save space and minimize packaging waste. Although the pipet tips are made from virgin medical-grade resins, the reload decks and rack bases are manufactured from 100% recycled polypropylene. Nonsterile decks and racks are steam autoclavable.

DeckWorks™ Hinged Rack Pipet Tips

Standard Tips

Corning® universal fit tips in hinged DeckWorks racks are available in 10 µL, 200 µL, 300 µL and 1000 µL sizes. The 10 µL, 300 µL and 1000 µL tips are extended length and allow for improved access into micro (1.5 mL) and standard conical bottom (15/50 mL) centrifuge tubes. Robust 96-tip racks are designed for repeated steam autoclave cycles and can be reused by removing the empty grey tip deck and replacing it with a new reload deck of 96 tips from the DeckWorks reload system.

Low Binding Barrier Tips

Corning® DeckWorks™ low binding barrier tips feature an inert, high-density polyethylene barrier to eliminate aerosol carryover contamination during critical pipetting procedures. Color, natural. DeckWorks low binding barrier tips will not trap liquids or inhibit PCR in the event of over-pipetting.

DeckWorks™ Tip Station

Corning® DeckWorks tip station maximizes bench space while minimizing plastic waste. Tip stations contain 960 tips, are available in extended length 10 µL and traditional 200 µL sizes, and are the ideal single and multichannel pipetting stations. The 5-layer deck design (2 x 96) matches the microtiter plate format. This stable pipetting platform fits easily into sterile hood environments. Lids can be snap-positioned to expose a single side (96 tips) only. Applications include pre- and post-PCR procedures, cell culture and assays requiring large tip quantities. Corning DeckWorks tip stations are offered both sterile and nonsterile, color natural.
